DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a method for selectively enriching/removing a serum albumin

from a mixture of other compounds by contacting the mixture with a ligand.

Group II, claim(s) 9-10, drawn to a method for screening ligand structures.

The inventions listed as groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method of group II lacks novelty (i.e., it is anticipated by a prior art reference). WO 98/08603 describes experiments performed in order to determine the efficiency of different ligands (such as ,e.g., 2-mercapto benzthiazol) to bind bovine serum albumin, see pages 66-68). The group II claims, which are directed to a method for screening for ligand structures that selectively bind serum albumin, are not considered novel over WO 98/08603. Thus, the special technical feature which links the claims does not provide a contribution over the art (with respect to group II) so unity of invention is lacking.

This application also contains claims directed to the following patentably distinct species of the claimed invention:

For R1-R4- select **one** hydrogen, electron-withdrawing group, such as halogen or a lower alkyl group.

For Z and Y- select **one** from oxygen, sulphur or nitrogen.

Applicant is advised that this is a restriction and not an election of species. Amendment of the claims to delete non-elected subject matter is required prior to allowance.

Because the restriction/election requirement is complex, a telephone call to applicant's attorney to request an oral election was not made. See MPEP 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
